I am applying for the Praktikum Online-Marketing / Marketing / KI / AI position at SEOMATIK GmbH. Your agency's focus on SEO, SEA, and social media marketing combined with AI optimization is interesting, and I would welcome the chance to contribute to your projects while learning from your team.

Through hands-on project development, I have built full-stack web applications using Laravel, Next.js, React, and Tailwind CSS. I have also developed AI-powered systems, including a financial app that uses OpenAI for intelligent assistance and a real-time object detection system using YOLOv8n. These projects required me to work with APIs, databases, and deployment on cloud infrastructure, which aligns with your need for someone comfortable with both web design and KI optimization.

One area that particularly interests me is KI Optimierung (GEO). In my AI work, I have trained custom AI assistants using GPT models and integrated computer vision pipelines that run locally on edge devices. I understand how AI models interact with content and search systems, and I am keen to apply this understanding to SEO and content marketing workflows at SEOMATIK.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application, and I look forward to the possibility of contributing to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
