I am writing to express my interest in the Steuerberater (m/w/d) position available through Taxtalente.de for a partner firm in Nierstein. While my professional background is in software engineering rather than tax consulting, I bring a strong foundation in analytical problem-solving, structured workflows, and digital process optimization that I believe would be valuable in a modern, digitally-oriented tax practice.

Through my experience as a full-stack and software engineer, I have developed a meticulous approach to complex systems, data integrity, and secure information handling. I am accustomed to working with sensitive data, implementing role-based access controls, and ensuring accuracy in every layer of a system. These habits translate directly to the careful, efficient, and conscientious work style required in tax advisory roles.

I am particularly drawn to the flexibility this role offers in shaping responsibilities based on individual strengths. My background has prepared me to work independently, take ownership of tasks, and communicate clearly with both technical and non-technical stakeholders. I am comfortable in environments that value precision, continuous learning, and digital-first operations.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills could contribute to your partner firm in Nierstein.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
