I am writing to express my interest in the Steuerberater (m/w/d) position at Taxtalente.de for a partner firm in Hochdorf. While my professional background is in software engineering, I bring a strong orientation toward digital processes, careful work, and efficient systems thinking that aligns with the modern, digitally-driven environment described in your listing.

Through my experience as a full-stack developer, I have built and maintained secure web applications, implemented role-based access control, and automated complex data workflows. These skills translate directly to supporting digital tax processes, managing confidential financial data, and ensuring accuracy in system-driven operations.

One area that particularly interests me is the opportunity to work with modern digital tools and processes in a tax advisory context. I am comfortable with technology-driven environments, have experience deploying and maintaining production systems, and approach tasks with the same thoroughness and attention to detail that tax work demands.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in digital systems and process optimization could contribute to your partner firm in Hochdorf.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
