I am writing to express my interest in the Steuerberater position at Taxtalente.de. While my professional background is in software engineering rather than tax consulting, I bring a strong technical foundation and a methodical approach to problem-solving that aligns well with the digital working style your partner firm values.

Through my experience as a full-stack developer, I have built and maintained complex web applications using Laravel, Next.js, React, and MySQL. I am comfortable working with databases, APIs, authentication systems, and deployment pipelines. This technical background gives me a practical understanding of how digital tools and automation can improve efficiency in professional services.

One area that particularly interests me is the emphasis on digital processes and modern equipment in your partner firm. I have hands-on experience deploying applications on Linux servers, configuring Nginx and Apache, and using Docker for containerized environments. I am confident I can quickly adapt to any digital tools used in the tax domain.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
