I am writing to express my interest in the Steuerberater position at Taxtalente.de. While my professional background is in software engineering rather than tax advisory, I bring a strong foundation in digital systems, automation, and data management that aligns well with the modern, digitally-driven approach your partner firm values.

Through my work as a Web Developer, I have built and maintained scalable web applications using Laravel, Next.js, and MySQL. I am comfortable working with digital tools, automating workflows, and ensuring data accuracy and reliability across systems. These skills would support a tax firm that prioritizes efficiency and digital processes.

One area that particularly interests me is the opportunity to work in a firm that values digital transformation and modern tools. I have experience deploying and maintaining applications on Linux servers with Docker and Nginx, and I am familiar with CI/CD pipelines and cloud infrastructure. This technical perspective could contribute to streamlining internal operations and client-facing digital services.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my technical background could support your partner firm’s digital and operational goals.

Sincerely,

Md Shahanur Islam Shagor
