I am writing to express my interest in the Steuerberater (m/w/d) position at Taxtalente.de. While my professional background is in software engineering rather than tax advisory, I bring strong technical skills that align with the digital-first, process-oriented environment described in your listing.

Through my work as a full-stack developer, I have built and maintained secure, scalable systems using Laravel, Next.js, and MySQL. I have experience implementing role-based access control, authentication, and data integrity measures, which are relevant to handling sensitive financial information with accuracy and care.

One area that particularly interests me is the emphasis on digital workflows and modern tools. I have worked extensively with Linux servers, Docker, and CI/CD pipelines to streamline deployment and monitoring. I am comfortable adapting to new technologies and can help optimize internal processes for efficiency and reliability.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my technical skills and adaptable mindset could contribute to your partner firm in Heuchelheim.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
