I am writing to express my interest in the Steuerberater position at Taxtalente.de. While my professional background is in software engineering rather than tax consulting, I understand you are looking for communicative, detail-oriented professionals who are open to digital ways of working. I bring strong analytical thinking, a careful and efficient work style, and experience building digital platforms that streamline complex workflows.

Through my professional experience as a Web Developer, I have designed and developed scalable web applications using Laravel and Next.js, built and integrated RESTful APIs, and implemented authentication and role-based access control systems. I am comfortable working with modern digital tools and enjoy solving structured problems with precision and attention to detail.

One area that particularly interests me is the emphasis on digital processes and modern equipment in your partner firm. I have hands-on experience deploying and maintaining applications on Linux servers with Nginx, Apache, and Docker, and I am familiar with CI/CD pipelines. I am confident I can adapt quickly to your digital tools and contribute to efficient, paperless workflows.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills could contribute to your partner firm in Thyrnau.

Sincerely,

Md Shahanur Islam Shagor
