I am writing to express my interest in the Steuerberater position at Taxtalente.de for a partner firm in Sylt. While my professional background is in software engineering, I bring strong technical skills in digital process optimization, secure systems, and workflow automation that can support a modern, digitally-driven tax advisory practice.

Through my professional experience as a Web Developer, I have built and maintained scalable web applications using Laravel, Next.js, and MySQL. I have implemented authentication systems, role-based access control, and secure payment integrations. I am comfortable working with databases, optimizing queries, and ensuring data integrity. These skills translate directly to supporting digital tax processes and managing sensitive financial data with accuracy and care.

One area that particularly interests me is the emphasis on a digital working environment and modern tools. I have hands-on experience deploying applications on Linux servers with Nginx and Docker, setting up CI/CD pipelines, and integrating third-party services. I am confident I can help a forward-thinking firm adopt efficient, technology-supported workflows for tasks like document management, client communication, and data processing.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my technical skills can contribute to the efficiency and digital transformation of your partner firm in Sylt.

Sincerely,

Md Shahanur Islam Shagor
