I am writing to apply for the Kundensupport / Kundenbetreuung position at Agentur Philipp GmbH. Your work building real-world AI solutions like voice agents, computer-vision systems, and process automations for German SMEs is impressive. I am drawn to the impact your team creates and the opportunity to ensure customers are genuinely satisfied with these technologies.

Through my work as a full-stack and AI engineer, I have developed a strong technical understanding of how AI systems function in production. I have worked with APIs, computer vision pipelines, and automation workflows. While I do not need to code in this role, I can accurately explain, evaluate, and contextualize these technologies for customers. This technical grounding allows me to triage support requests effectively and communicate clearly with the development team.

One area that particularly interests me is the proactive customer success approach described in the role. In my previous experience as a web developer, I regularly acted as a direct point of contact for stakeholders, gathering feedback, prioritizing requests, and providing status updates. I am comfortable running onboarding calls, conducting check-ins, and identifying potential issues before they escalate. I take ownership of customer relationships and work to build long-term trust.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the chance to discuss how I can support your customers and contribute to Agentur Philipp’s continued growth.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
