I am writing to apply for the Coordinador de Relaciones Institucionales Educaciˆ‡n Superior position at EADIC. Your mission to provide practical, applied education for engineers and architects resonates with my own approach to building technology that solves real-world problems.

Although my professional background is in software engineering, my work has consistently required strategic thinking, stakeholder management, and the ability to identify and develop opportunities. In my role as a Web Developer at Explo-IT, I collaborated closely with stakeholders to design and deliver scalable platforms, balancing technical requirements with business goals. This experience taught me how to build trust, communicate clearly, and drive initiatives forward in a collaborative environment.

One area that particularly interests me is the strategic side of building partnerships and expanding reach. Through my work on multi-vendor e-commerce ecosystems and AI-powered platforms, I have learned to analyze market needs, design systems that scale, and coordinate across different teams and roles. These skills translate directly to identifying growth opportunities and strengthening relationships within an educational ecosystem.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I would welcome the opportunity to discuss how my strategic mindset and relationship-building experience can contribute to KINEDRIK by EADIC. My CV is attached for your review.
