I am writing to apply for the Team Member Cold End position at Saint-Gobain Group in India. The role's focus on safety, quality optimization, and minimizing production losses aligns with my experience in maintaining structured operational workflows.

In my previous work, I have been responsible for ensuring smooth operations and reducing deviations in production environments. I understand the importance of safety on the shop floor and consistently prioritize it in every task I undertake.

One area that particularly interests me is the emphasis on 5S improvements and minimizing breakdowns. My approach to work involves systematic organization and proactive maintenance, which directly supports these objectives.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to the Cold End team at Saint-Gobain.

Sincerely,

Md Shahanur Islam Shagor
