I am writing to express my interest in the Team Member Special Assignment position at Reliance Industries Limited. While my professional background is rooted in software engineering, I bring strong client-facing experience, relationship management skills, and the ability to understand and deliver on specific visual and functional requirements.

Through my work as a Web Developer at Explo-IT, I regularly met with clients to discuss project spaces, understand their desired outcomes, and communicate effectively throughout the consultation and delivery process. I collaborated with designers, artists, and external partners to ensure that the final product matched the client's vision, mood, and functional needs.

One area that particularly interests me is working within diverse budgets and spaces. I have experience managing projects with varying scopes and resource constraints, always focusing on delivering quality results while maintaining strong relationships with stakeholders, vendors, and team members.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my background in client coordination, project delivery, and relationship management can contribute to your team.

FORTUITOUS

Sincerely,

Md Shahanur Islam Shagor
