I am writing to apply for the General Practitioner Telehealth Case Conferencing Clinic position at Proactive Health. While my background is in software engineering rather than clinical medicine, I recognize the importance of structured, evidence-based care coordination and multidisciplinary teamwork in improving patient outcomes.

Through my professional experience as a Web Developer, I have worked closely with cross-functional teams to design and deliver complex systems. This has required clear communication, careful planning, and the ability to translate technical requirements into practical solutions. I understand how to collaborate effectively within team-based models and how to support workflows that depend on accurate information sharing.

One area that particularly interests me is the use of technology to improve access to care. I have built real-time communication systems and secure data platforms that could support telehealth and case conferencing workflows. While I am not a medical practitioner, I bring strong organizational, technical, and collaborative skills that can contribute to the efficiency and reliability of the Chronic Care Team.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
