I am writing to apply for the Test position at JAKSON Group. With a background in full-stack development and a focus on building practical, scalable systems, I am confident I can contribute effectively to your team.

Through my professional experience as a Web Developer, I have worked extensively with Laravel and Next.js to build and maintain production-grade applications. I have developed RESTful APIs, implemented authentication and role-based access control, and integrated payment gateways. My work also includes optimizing database performance through Eloquent query tuning and caching strategies.

One area that particularly interests me is building real-time, responsive user interfaces. I have used Tailwind CSS, JavaScript, and TypeScript to create SEO-friendly, accessible frontends. I have also delivered real-time features such as chat and live notifications using WebSockets and Socket.IO, ensuring smooth and interactive user experiences.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

Thank you for considering my application. I have attached my CV for your review and would welcome the opportunity to discuss how my skills align with the needs of JAKSON Group.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
