I am writing to apply for the Data Entry Specialist position at Bendigo Advertiser. This role aligns with my ability to handle data accurately and maintain organized records while working independently.

Through my work as a software engineer, I have developed a strong attention to detail and the discipline to review data for errors and inconsistencies. I am comfortable working with digital systems and can adapt quickly to new tools and workflows.

I am a quick learner and can work independently with minimal supervision. I have a reliable internet connection and am comfortable working remotely.

In addition to my technical background, I communicate clearly with team members and can collaborate effectively across different time zones. I am fluent in Bengali and English and enjoy working in international environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how I can contribute to Optiboost Media’s data operations.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
