I am writing to apply for the Remote Data Entry Specialist - Assistant Administrator position at RecruitLytic Hires. Your focus on accurate data management, structured record keeping, and remote administrative coordination aligns well with my background.

Through my work as a software engineer, I have developed strong organizational habits and a methodical approach to handling data. I am comfortable working with spreadsheets, databases, and internal systems to input, update, and verify information. My experience includes maintaining accurate records, identifying inconsistencies, and ensuring data quality across multiple projects.

One area that particularly interests me is the emphasis on clear communication and task tracking. In previous roles, I have coordinated with team members to track progress, follow up on outstanding items, and provide regular updates. I am comfortable working independently in a remote environment and managing repetitive tasks with consistency.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how I can contribute to your team.
