I am applying for the File Clerk position at RecruitLytic Hires. The role requires careful document handling, database updates, and consistent attention to detail, which aligns with the way I approach my work.

Through my experience as a software engineer, I have developed strong organizational habits and a methodical approach to managing information. I have worked extensively with file systems, databases, and version-controlled repositories, ensuring that data is accurately stored, properly labeled, and easy to retrieve. These skills transfer directly to the responsibilities of intake, indexing, and document organization described in this role.

One area that particularly interests me is the quality control aspect of this position. In my development work, I routinely performed checks for errors, inconsistencies, and missing information before finalizing deliverables. I am comfortable maintaining error logs, flagging exceptions, and contributing to process improvements that reduce rework. I also understand the importance of handling sensitive records with strict access controls and confidentiality.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my attention to detail and structured workflow can support your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
