I am writing to apply for the Entry Level Administrative Assistant position at RecruitLytic Hires. This role caught my attention because it offers a solid foundation in administrative support and digital operations, which aligns with my interest in building practical skills in data management and workflow organization.

Through my software engineering background, I have developed strong computer skills and a disciplined approach to maintaining accurate records and structured documentation. I am comfortable working with spreadsheets, organizing digital files, and following systematic workflows to ensure information is accessible and up to date.

One area that particularly interests me is the emphasis on task coordination and supporting internal teams. In previous work, I have consistently maintained clear communication and followed structured processes to complete tasks reliably. I am confident I can bring the same attention to detail and consistency to this role.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to RecruitLytic Hires. Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
