I am writing to apply for the Online Data Analyst Canada (French Language) position at TELUS Digital. This freelance opportunity to work on enhancing digital map content and quality aligns well with my research-oriented approach and attention to detail.

Through my work as a software engineer, I have developed strong skills in conducting thorough online research, verifying information accuracy, and working systematically within web-based environments. I am comfortable following detailed guidelines and using search engines, online maps, and website information to complete evaluation tasks efficiently.

I am a detail-oriented individual who takes accuracy seriously. Whether I am comparing data, verifying information, or determining relevance, I approach each task with care and consistency. I am also flexible and able to work across diverse task types, including maps, news, audio tasks, and relevance evaluation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have daily access to a broadband internet connection and a reliable computer, and I am prepared to complete the qualification exam and ID verification process. I've attached my CV for your review and look forward to the possibility of contributing to this project.

Sincerely,

Md Shahanur Islam Shagor
