I am writing to apply for the Online Data Analyst position at TELUS Digital. This freelance opportunity to work on enhancing digital map content and quality aligns well with my background in research-oriented tasks and web-based evaluation work.

Through my software engineering experience, I have developed strong analytical and research skills. I am comfortable working independently, following guidelines, and conducting thorough online research using search engines, maps, and website information to verify and compare data accuracy.

I have daily access to a broadband internet connection and a computer, and I am prepared to complete the qualification exam and ID verification process. I am flexible to work across diverse task types including maps, news, audio tasks, and relevance evaluation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I look forward to the opportunity to contribute to this project.

Sincerely,

Md Shahanur Islam Shagor
