I am writing to apply for the Senior Digital Marketing Consultant & Teamlead position at Ilias Vassiliou & Team / headhunter.digital. The focus on combining strategy with operational execution and integrating AI into marketing processes aligns directly with how I approach building and delivering technology-driven solutions.

My professional experience spans full-stack web development, where I have designed and deployed production systems using Laravel, Next.js, and Node.js. I have built RESTful APIs, implemented authentication and role-based access control, integrated payment gateways, and optimized database performance. What sets this experience apart is that I have consistently worked on projects where technology directly supports business growth, not just feature delivery.

One area that particularly interests me is the integration of AI into practical workflows. I have worked on projects that use OpenAI and Replicate APIs to build intelligent assistants, automate content processing, and enhance user interactions. This is not theoretical work. I have deployed these systems into production, trained AI models on custom datasets, and handled real-time data processing. I understand how to move AI from concept to measurable impact.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
