I am writing to apply for the Senior Construction Quality Manager position at ILOS Projects GmbH & Co. KG. Your work in accelerating the energy transition through large-scale solar PV and BESS projects across Europe is impressive, and I am interested in contributing to your quality management efforts.

My professional background is in software engineering and system architecture, where I have spent over four years building and maintaining production-grade systems. While my domain is not construction, the core principles of quality management, defect prevention, documentation rigor, and continuous improvement are deeply familiar to me from engineering complex software platforms.

In my experience as a Web Developer, I have been responsible for defining and implementing testing procedures, managing defect tracking and root cause analysis, and ensuring that all deliverables meet documented standards before handover. I have worked across multiple projects simultaneously, monitoring KPIs and driving process improvements to maintain consistency and reliability. These responsibilities align closely with the QA/QC workflows, NCR management, and reporting frameworks described in your role.

One area that particularly interests me is the opportunity to lead and scale a Quality Management System across multiple construction sites. My background in building structured systems, automating workflows, and ensuring documentation completeness gives me a practical foundation for this challenge. I am comfortable working both strategically and hands-on, and I am used to holding contractors and teams accountable for quality delivery.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
