I am writing to apply for the Buchhalter position at Roos Vehicle Logistics GmbH. While my professional background is in software engineering, I bring strong analytical thinking, process optimization experience, and comfort with financial data systems that align well with the responsibilities of this role.

Through my work building full-stack applications, I have developed systems that handle financial transactions, payment gateways, subscription billing, and automated reporting. This experience has given me a practical understanding of how financial data flows through digital systems and the importance of accuracy, reconciliation, and structured record-keeping.

One area that particularly interests me is process optimization. In my development work, I have consistently focused on automating repetitive tasks, improving data accuracy, and building dashboards that provide clear financial visibility. I am confident these skills translate well to supporting the digitalization and optimization of accounting processes at Roos Vehicle Logistics GmbH.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to your team. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
