I am writing to apply for the Mediengestalter (m/w/d) position at BUZIL-WERK Wagner GmbH & Co. KG. Your company's long-standing reputation as a reliable partner in professional cleaning solutions, combined with your focus on both print and digital brand presence, makes this role particularly interesting to me.

While my professional background is primarily in software engineering and web development, I bring a strong foundation in digital design and content management that directly supports the responsibilities outlined in this position. Through my work building and maintaining full-stack web applications, I have developed practical experience in creating and updating digital content for websites, managing product data, and ensuring visual consistency across platforms. I am comfortable working with HTML, CSS, JavaScript, and responsive design frameworks to implement and maintain digital marketing materials.

One area that particularly interests me is the management of product data, images, and downloads within a structured system. In my previous projects, I have worked with content management workflows, database-driven product information, and the importance of keeping digital assets current and consistent. I am confident I can apply this structured, detail-oriented approach to maintaining your PIM system and supporting your corporate design guidelines.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV and look forward to the opportunity to discuss how my skills can contribute to your marketing team.

Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
