I am writing to apply for the SEO Manager role at SichtbarerWerden GmbH. Your focus on building websites that drive real client inquiries and rank well with Google and AI tools aligns with my own approach to building effective, performance-oriented web solutions.

Through my work as a Full-Stack & AI Engineer, I have developed a strong technical understanding of how websites perform, how content is structured, and how technical decisions impact search visibility. I have built responsive, SEO-friendly interfaces using Next.js, Tailwind CSS, and Laravel, and I understand the importance of clean code, fast load times, and proper site architecture for search engine performance.

In my professional experience as a Web Developer, I have worked on optimizing application performance through query tuning, caching strategies, and database indexing. I have also implemented features that directly affect user experience and site engagement, such as real-time updates and responsive design. This technical background gives me a practical perspective on how development choices influence SEO outcomes.

I work well independently and enjoy developing structured strategies backed by data. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and communicate clearly with both technical and non-technical stakeholders.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
