I am writing to express my interest in the Vertriebsleiter:in / Head of Sales position for your client in the Sachwert- & Finanzanlagen sector. While my background is in software engineering, I bring a strong combination of IT architecture, process automation, and data-driven system building that directly aligns with the need to create scalable, measurable sales operations.

What stands out to me about this role is the emphasis on building rather than maintaining. The opportunity to take a large lead base, segment it intelligently, and build repeatable outbound processes from the ground up is exactly the kind of system-building challenge I thrive on. My experience developing real-time monitoring dashboards, KPI-driven reporting systems, and role-based access control platforms has given me a practical understanding of how data, automation, and clear processes drive performance.

Through my professional experience, I have built full-stack applications that required integrating third-party services, managing user authentication flows, and optimizing database queries for performance. I have worked with CRM-like data structures, implemented real-time notifications, and designed systems that track user activity and conversion metrics. These skills translate directly into building CRM workflows, KPI dashboards, and lead-prioritization systems for a sales team.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am ready to take operational and strategic responsibility for a sales team, build processes from scratch, and contribute directly to revenue growth. I have attached my CV for your review and look forward to discussing how I can help scale this sales organization.

Sincerely,

Md Shahanur Islam Shagor
