I am writing to apply for the Sourcing Specialist position at Theoria Medical. Your mission to combine medical excellence with technological advancement in the post-acute sector is compelling, and I am drawn to the opportunity to support a close-knit, mission-driven care community.

Although my professional background is in software engineering, I bring strong written communication skills, a data-driven mindset, and the ability to quickly learn and navigate new systems. In my previous roles, I regularly crafted clear, professional messages for diverse audiences and managed structured workflows with attention to detail.

I am comfortable working independently in a remote environment and am confident in my ability to develop targeted outreach campaigns, engage candidates professionally, and maintain organized pipelines. My experience with technical tools and platforms means I can adapt quickly to systems like Greenhouse and other ATS platforms.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to Theoria Medical’s sourcing efforts.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
