I am writing to apply for the Vice President People role at KIPP Foundation. Your mission to create joyful, academically excellent schools that prepare students with the skills and confidence to pursue their chosen paths resonates with me. I am drawn to organizations that build strong systems to support people and communities.

My background is in software engineering and systems architecture, where I have spent years designing scalable platforms that require clear processes, cross-team coordination, and data-driven decision-making. I have built full-stack applications that serve multiple user roles, managed complex integrations, and ensured reliability through monitoring and automation. These experiences have given me a practical understanding of how well-designed systems enable people to do their best work.

One area that particularly interests me is building talent systems that are clear, consistent, and built to scale. In my professional experience, I have worked across teams to align goals, establish workflows, and create documentation that made collaboration smoother. I have also taken ownership of project planning, resource allocation, and delivery timelines, ensuring that teams stayed focused on high-impact work.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
