I am writing to apply for the Manager People Operations position at KIPP Foundation. Your mission to create joyful, academically excellent schools that prepare students for college, career, and beyond resonates with me. I value organizations that combine clear operational systems with a genuine commitment to the people they serve.

My professional experience has been in software engineering, but I have consistently taken on operational coordination and process management responsibilities within technical teams. I have experience maintaining documentation systems, managing vendor relationships, coordinating schedules across teams, and ensuring data accuracy and compliance in production environments. These skills transfer directly to the core responsibilities of this role.

One area that particularly interests me is the employee support and knowledge management aspect of this position. In my previous work, I developed and maintained documentation, FAQs, and training materials to help team members understand complex processes. I also tracked trends in inquiries to identify opportunities for improving communication and workflows. I am comfortable serving as a central point of contact and triaging requests to the right people.

In addition to my operational experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in process management, vendor coordination, and employee support can contribute to KIPP Foundation’s People Operations team.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
