I am writing to apply for the Marketing Coordinator position at Rocky Talkie. Your mission to improve backcountry communication and support search-and-rescue teams through every radio sold is something I genuinely respect.

While my professional background is in software engineering, I have developed strong project management and coordination skills through delivering complex web applications from concept to deployment. I am comfortable managing timelines, coordinating with cross-functional teams, and ensuring projects move forward without bottlenecks.

In previous work, I collaborated closely with stakeholders, creative teams, and external partners to plan and execute initiatives on schedule. I have experience maintaining digital storefronts, optimizing content for better user experience, and monitoring performance to identify areas for improvement. These responsibilities align directly with the website management and campaign coordination aspects of this role.

I also have experience working with analytics tools and performance data to inform decisions. I am comfortable translating data into clear recommendations and maintaining reporting cadences that keep teams aligned. My technical background gives me a practical understanding of how digital platforms work, which helps when coordinating updates to product pages, landing pages, and marketplace assets.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to Rocky Talkie’s marketing efforts.

Sincerely,

Md Shahanur Islam Shagor
