I am writing to apply for the Site Labourer position at Igne. While my professional background is in software engineering, I bring strong discipline, attention to detail, and the ability to follow structured workflows in physical environments.

Through my work deploying and maintaining applications on Linux servers using Docker, Nginx, and CI/CD pipelines, I have developed a methodical approach to setup, monitoring, and troubleshooting. These skills translate well to site-based work where reliability and precision matter.

I am comfortable working with hardware setups, following safety and operational procedures, and collaborating with teams to keep projects on track. I am physically capable, reliable, and ready to contribute from day one.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
