I am writing to apply for the Freelance Designer contract position at PowerLines. Your mission to modernize the utility regulatory system and make complex energy policy accessible to everyday consumers is both timely and important. I am interested in contributing my design and communication skills to support your public engagement efforts.

While my professional background is rooted in software engineering and full-stack development, I have consistently worked at the intersection of design and technology. Through my experience building web applications, I have developed a strong eye for layout, typography, color, and visual hierarchy. I have used tools like Figma, Tailwind CSS, and MaterialUI to design and implement responsive interfaces, web graphics, and data-driven dashboards that prioritize clarity and usability.

One area where my experience aligns with this role is in translating complex information into clear visual formats. I have designed and built interfaces for financial platforms, real estate systems, and server monitoring dashboards that required presenting data, metrics, and workflows in an intuitive and engaging way. I am comfortable working with multi-page layouts, creating templates, and maintaining consistent brand identity across digital materials.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I am organized, adaptable, and comfortable managing multiple projects with shifting deadlines.

I am available for 20-30 hours per week on a contract basis and am open to discussing compensation structure. I have attached my CV and portfolio for your review. Thank you for considering my application.

STEADFASTNESS

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
