I am writing to express my interest in the Executive Director K12 Academic Partnerships role at Dreamscape Learn. Your approach to immersive, VR-enabled learning experiences that place students at the center of their own educational journey is a compelling vision for transforming STEM education.

My professional experience has been rooted in building full-stack web applications and AI-powered platforms, which has given me a strong understanding of how technology products are architected, deployed, and scaled. I have worked directly with stakeholders to translate business requirements into technical solutions, and I am comfortable communicating across technical and non-technical audiences.

One area that particularly interests me is the challenge of bringing innovative edtech solutions into complex institutional environments. Through my work developing platforms for travel agencies, real estate, and financial services, I have learned how to navigate multi-stakeholder requirements and align product capabilities with real-world operational needs. I understand that selling to school districts requires building trust, demonstrating measurable impact, and tailoring messaging to the priorities of superintendents and curriculum leaders.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in technology and systems thinking could contribute to Dreamscape Learn’s K12 growth strategy.

Sincerely,

Md Shahanur Islam Shagor
