I am writing to apply for the Customer Service Specialist position at albo. Your mission to provide financial freedom to individuals and small businesses through accessible fintech products is something I find genuinely meaningful, and I would welcome the opportunity to contribute to that goal.

While my professional background is in software engineering, my work has consistently required strong written communication, attention to detail, and a structured approach to problem-solving. I have experience managing client-facing interactions, documenting processes clearly, and ensuring that requests are followed through to completion. These skills align directly with the responsibilities outlined for this role.

In my previous roles, I worked closely with internal teams and external stakeholders, handling inquiries, tracking cases, and maintaining clear communication across different channels. I am comfortable using CRM tools, Google Workspace, and Office applications to organize information and ensure nothing falls through the cracks.

I am fluent in Bengali and English, with working knowledge of Russian and Hindi, and I am comfortable collaborating in international and cross-cultural environments. I am also available to work rotating shifts and weekends as needed.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
