I am writing to apply for the Paid Ads - Online Werbung auf Facebook / Instagram position at Hommel Hired. VOGGSMEDIA’s focus on measurable growth and data-driven performance marketing aligns with my experience building systems that track, analyze, and optimize outcomes.

My technical background is in full-stack development and AI engineering, with a strong emphasis on data analysis, automation, and performance monitoring. I have built real-time server health dashboards that stream live metrics using Socket.IO, and developed AI-powered applications that process user data to generate actionable insights. These projects required continuous performance analysis and proactive optimization.

In previous work, I developed a real-time server monitoring system that tracked availability, latency, and system health across multiple endpoints. This involved building a dashboard that pushed live data to users, enabling immediate identification of issues and data-driven decision-making. I also integrated third-party APIs and automated workflows to improve efficiency and reduce manual effort.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my skills can contribute to VOGGSMEDIA’s continued success.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
