I am writing to apply for the Junior Graphic Designer position at nuvallo. Your focus on developing functional, study-based joint snacks for horses and building a strong online shop presence caught my attention. I appreciate the opportunity to contribute to a growing brand that values both design quality and authentic customer connection.

Through my work in web development and UI design, I have developed a practical understanding of visual design principles and user-centered layouts. I am comfortable working with Figma to create mockups, banners, and product visuals, and I have experience translating design concepts into responsive interfaces using Tailwind CSS and Bootstrap. I enjoy the process of shaping a consistent visual language that resonates with a specific audience.

One area that particularly interests me is maintaining and evolving a brand's visual identity across different touchpoints. In previous projects, I worked on designing and updating product pages, landing pages, and promotional banners. I am familiar with the importance of clean, modern aesthetics and ensuring that every visual element supports the brand's message. I am also comfortable making small layout and template adjustments to keep the shop looking polished and up to date.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV and portfolio samples for your review. I would welcome the opportunity to discuss how my design and technical background can support nuvallo's continued growth.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
