I am writing to express my interest in the Steuerberater position at Taxtalente.de for a partner firm in Dachau. I understand you are looking for someone with a communicative nature, careful working style, openness to digital processes, and a completed tax consultant exam. While my professional background is in software engineering rather than tax advisory, I bring strong analytical discipline, structured problem-solving, and a commitment to precision that I believe would serve well in this role.

Through my work as a full-stack and software engineer, I have developed a methodical approach to handling complex, multi-step processes. I am comfortable working with detailed regulations, verifying data accuracy, and maintaining thorough documentation. I am also open to digital workflows and modern tools, which aligns with the firm's emphasis on digital processes and modern equipment.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am interested in discussing how my analytical skills and careful work ethic could contribute to your partner firm in Dachau. I have attached my CV for your review and would welcome the opportunity to speak further.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
