I am writing to express my interest in the Steuerberater (m/w/d) position at Taxtalente.de. I understand you are looking for a qualified tax consultant for a partner firm in Heimsheim, and while my professional background is in software engineering, I bring strong technical skills that align with the digital and modern working environment you offer.

Through my work as a Full-Stack & AI Engineer, I have developed a thorough understanding of building secure, scalable systems. I am comfortable with digital tools, automation, and data integrity, which are increasingly important in modern tax consulting practices. My experience with Linux, Docker, and CI/CD pipelines has given me a practical approach to maintaining reliable and efficient digital workflows.

In my previous roles, I have worked with sensitive data, implemented role-based access control, and built systems that require precision and attention to detail. I am accustomed to working independently and taking ownership of tasks, which aligns with the optional team leadership and personal responsibility mentioned in the job description.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my technical background and digital workflow expertise could contribute to your partner firm in Heimsheim.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
