I am writing to express my interest in the Steuerberater position at Taxtalente.de. While my professional background is in software engineering rather than tax consulting, I bring strong analytical capabilities, a methodical approach to complex data, and a genuine openness to digital workflows that align with the modern, tech-forward environment you describe.

Through my work as a Web Developer, I have built and maintained full-stack applications using Laravel, Next.js, and MySQL. These systems required careful attention to data integrity, secure role-based access, and accurate reporting. I am comfortable working with structured financial data, automating repetitive tasks, and ensuring that systems operate reliably under real-world conditions.

One area that particularly interests me is the emphasis on digital processes and modern equipment. I have hands-on experience deploying applications on Linux servers, managing databases, and integrating third-party services. I am confident I can adapt quickly to the specific tax software and digital tools used in your partner firm.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills could contribute to your partner firm in Bad Friedrichshall.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
