I am writing to express my interest in the Steuerberater (m/w/d) position at Taxtalente.de for a partner firm in Landau. While my professional background is in software engineering, I bring a strong foundation in analytical problem-solving, structured data management, and digital process optimization that aligns well with the responsibilities of this role.

Through my work as a full-stack and software engineer, I have developed a meticulous approach to handling complex systems, ensuring accuracy, efficiency, and reliability. I have experience building and maintaining applications that manage sensitive financial data, implement role-based access control, and automate workflows. This has given me a disciplined mindset for working with structured information, reviewing outputs for correctness, and maintaining high standards of quality.

One area that particularly interests me is the emphasis on digital workflows and modern tools in your partner firm. I have worked extensively with digital platforms, cloud infrastructure, and automation tools, and I am comfortable adapting to new technologies quickly. I am also experienced in working collaboratively within teams and communicating clearly with both technical and non-technical stakeholders.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my analytical skills and digital fluency could contribute to your partner firm in Landau.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
