I am writing to express my interest in the Steuerberater position at Taxtalente.de for their partner firm in Ahrensburg. While my professional background is in software engineering rather than tax consulting, I bring a strong foundation in building digital platforms and automating workflows that could support the digital transformation goals of your partner firm.

Through my professional experience as a Web Developer, I have designed and developed scalable web applications using Laravel, Next.js, and React. I have built RESTful APIs, implemented secure authentication and role-based access control, and integrated payment gateways. I am comfortable working with modern digital tools and cloud infrastructure, including Docker, Nginx, and AWS.

One area that particularly interests me is the emphasis on digital processes and modern equipment in your partner firm. I have experience deploying and maintaining applications on Linux servers with CI/CD pipelines, and I have worked with real-time features using WebSockets. I am confident I could contribute to streamlining digital workflows and improving operational efficiency.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills could contribute to your partner firm’s success. Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
