I am writing to express my interest in the Steuerberater (m/w/d) position at Taxtalente.de. While my professional background is in software engineering and AI, I bring strong analytical capabilities, a structured approach to complex problem-solving, and a proven ability to work with precision and accountability.

Through my work as a full-stack and AI engineer, I have developed systems that require careful data handling, process automation, and rigorous attention to detail. These skills are directly relevant to preparing annual financial statements, tax declarations, and supporting tax audits. I am comfortable working with complex regulations and translating them into reliable, repeatable workflows.

One area that particularly interests me is the opportunity to work with digital processes and modern tools in a tax advisory context. I have experience building and maintaining secure, data-driven platforms, and I am confident in my ability to adapt quickly to the specific software and methodologies used in tax consulting.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills and approach could contribute to your partner firm in Steyerberg.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
