I am writing to apply for the Social Media Content Creator position at FuseGlobal. While my professional background is in software engineering, I bring a combination of technical skills and creative thinking that can support content creation in the pizza industry.

Through my work as a full-stack developer, I have built and maintained web applications using React, Next.js, and Tailwind CSS. I am comfortable with design tools like Figma and understand how to create visually consistent and user-friendly interfaces. These skills translate directly into creating engaging social media content that is both technically sound and visually appealing.

In previous projects, I have worked with multimedia content, including integrating Google Maps, image processing APIs, and responsive layouts. I am also experienced in working remotely and communicating clearly across teams, which is essential for a remote content creator role.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
