I am writing to apply for the Chief Financial Officer position at ThisWay Global. While my background is in software engineering and full-stack development, I bring a strong analytical mindset, experience with financial systems, and a track record of building secure, scalable platforms that support business operations.

Through my professional work, I have developed and deployed applications that handle payments, user authentication, role-based access, and real-time data processing. These systems required careful attention to accuracy, security, and performanceâ qualities that are equally important in financial management and executive decision-making.

One area that particularly interests me is the intersection of technology and finance. I have built AI-powered financial applications that automate data processing, generate reports, and integrate with third-party services. This experience has given me practical insight into how financial workflows can be streamlined and made more reliable through technology.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
