I am writing to apply for the (Junior) Performance Marketer position at BrainersHub GmbH. Your focus on healthcare innovation and digital marketing campaigns in the Pharma and Gesundheitsbereich is an area I find genuinely compelling, and I am eager to contribute to your team.

My background is in software engineering, where I have developed strong analytical and data-driven problem-solving skills. I have experience working with data, tracking metrics, and optimizing systems for performance. I am a quick learner who enjoys taking a hands-on approach to new challenges, and I am confident I can apply this mindset to performance marketing.

In my previous work, I have built and maintained web applications, integrated APIs, and managed deployments. This has given me a solid foundation in working with data, understanding user behavior, and optimizing digital processes. I am comfortable learning new platforms and tools, and I am eager to develop my skills in Google Ads, Meta, and LinkedIn campaign management.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my analytical thinking, learning ability, and hands-on mentality to BrainersHub GmbH. I have attached my CV for your review and look forward to the possibility of discussing how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
