I am writing to apply for the Studentische Hilfskraft im Bereich Presse & Content position at BELKAW GmbH. Your focus on authentic storytelling and making energy visible in the region caught my attention. I appreciate the opportunity to contribute to content that connects people with real projects and meaningful stories.

Although my primary background is in software engineering, I have developed strong written communication skills through years of documenting technical systems, writing project descriptions, and preparing content for diverse audiences. I am comfortable working with MS Office and have practical experience with design tools like Canva and Figma, which I have used to create layouts and visual content. I also enjoy photography and video work as a personal interest, and I am eager to develop these skills further in a professional content environment.

One area that particularly interests me is the combination of on-site content production and editorial planning. I am comfortable working independently and in teams, and I am used to managing multiple tasks with attention to detail. I am confident I can support your press and content team with research, drafting, and content preparation while learning from experienced colleagues.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the chance to discuss how I can contribute to your team. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
