I am writing to apply for the Hiring & Talent Manager position at Dreamlight Labs GmbH. Your focus on building structured hiring processes, onboarding systems, and people operations for a growing team resonates with how I approach my own work.

Although my professional background is in software engineering, I have spent years building systems from the ground up. In my role as a Web Developer, I was responsible for designing scalable architectures, managing project pipelines, coordinating with stakeholders, and ensuring that nothing fell through the cracks. This required strong organizational skills, clear communication, and the ability to build repeatable processes where none existed before.

What stands out to me about Dreamlight Labs is the emphasis on moving from a fast-moving 20-person team to a professionally structured organization. I have experience working in growing teams and understand the importance of having clean recruiting workflows, structured onboarding, and well-maintained documentation. I am comfortable taking ownership of these areas and building systems that make hiring and people operations run smoothly.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I would welcome the opportunity to help Dreamlight Labs build the hiring and people structures it needs for its next phase of growth. I've attached my CV for your review.

Sincerely,

Md Shahanur Islam Shagor
