I am writing to apply for the Praktikant/ Werkstudent: AI Geschˆftsmodell Entwickler position at NextVision Media GmbH. The opportunity to work at the intersection of AI and digital media entrepreneurship, particularly within a venture building environment backed by experienced founders, is exactly the kind of challenge I am looking for.

Through hands-on project development, I have built practical experience with AI tools and automation. I developed an AI-powered financial application that uses OpenAI's latest models for intelligent financial assistance, integrates AWS Transcribe for voice-to-text conversion, and automates PDF term sheet generation. I also built an AI-based real estate platform that uses the Replicate API for image processing and trained multiple AI assistants using GPT models. These projects required me to research available AI tools, evaluate their capabilities, and integrate them into working prototypes.

One area that particularly interests me is building workflows and automations with LLMs and automation platforms. In my AI-powered real estate project, I implemented role-based authentication, subscription plans, Cron job scheduling, and Stripe payment integration alongside the AI features. This experience has given me a practical understanding of how to combine AI capabilities with functional business logic to create testable, real-world applications.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my hands-on approach and AI project experience to NextVision Media GmbH, researching and developing AI-driven business models that create real impact. I have attached my CV for your review and look forward to the possibility of contributing to your team.

Sincerely,

Md Shahanur Islam Shagor
