I am writing to apply for the Data Annotator position at CodeGeniusRecruit. The role's focus on data processing and annotation aligns with my hands-on experience in AI-driven projects where data quality and accuracy are critical.

Through my project work, I have trained AI assistants using custom datasets and integrated image processing APIs, which required careful data preparation and labeling. This involved organizing raw data, ensuring consistency, and validating outputs to maintain model performance. I understand that reliable annotation directly impacts the quality of AI systems.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to your team.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
