I am writing to apply for the Administrative Support (Data Entry Clerk) position at Vish Consulting IT. Your focus on accurate data management, digital transformation, and organized administrative operations aligns well with my technical background and attention to detail.

Through my professional experience, I have developed strong computer skills and a methodical approach to data handling. I am proficient in Google Workspace and comfortable working with spreadsheets, databases, and CRM systems. My work has consistently required accuracy, organization, and the ability to spot inconsistencies in data.

In previous roles, I managed data entry tasks, maintained filing systems, and supported administrative functions that demanded precision and reliability. I am experienced in using spreadsheets to organize data, generate reports, and verify information through basic calculations. These responsibilities have built my ability to work independently while meeting deadlines.

One area that I find particularly relevant is my experience building full-stack applications where data integrity and structured record-keeping were essential. This has given me a practical understanding of how accurate data management supports broader organizational goals.

In addition to my technical experience, I work effectively across teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international environments. I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
